SUMMARY

Senior full-stack engineer with 8+ years shipping production web and desktop software across healthcare, fintech, education and SaaS. Strongest in .NET backends built on clean/hexagonal architecture, with Angular, Vue and React front ends and cloud-native delivery on Azure and AWS. Regularly owns systems end-to-end — infrastructure-as-code, CI/CD, observability and OAuth2/OIDC security — while setting standards and mentoring engineers.

Lead

architecture, standards & mentoring teams of 4–10

EXPERIENCE

Architect Engineer (Full-stack & DevOps) · AI-Driven Enterprise Procurement Platform 06/2025 – Present

Procurement platform for a Japanese engineering & construction client — quotations, contracts, vendor analytics, AI cost forecasting. Team of 10.

- Architected the Azure infrastructure with Terraform, bootstrapped the codebase and set the layered architecture and coding standards the team builds on.
- Built .NET services and REST APIs, an Angular shared component library, and AI analytics endpoints behind KPI dashboards and real-time bottleneck alerts.
- Designed REST and pub/sub integration contracts; secured every service boundary with OAuth2/OIDC via Auth0.
- Shipped multi-stage CI/CD (GitHub Actions, Azure DevOps) with quality gates across four isolated environments; added Serilog logging, metrics and distributed tracing to meet SLA, RTO and RPO targets.
- Introduced the test strategy from scratch: k6 load testing and Playwright end-to-end tests on every release.

Tech: .NET, C#, Entity Framework, Angular, Next.js, Azure, Terraform, Docker, PostgreSQL, Redis, Auth0, Serilog, k6, Playwright

Full-stack Developer · Tinybeans — family photo-sharing app

01/2024 – 06/2025

Private photo & video journal used by millions of families on iOS, Android and web. Team of 9+.

- Built Java REST APIs for the core photo-sharing and family timeline services, and UI features in the Ember.js web app.
- Integrated subscription payments across platforms: Stripe, Apple In-App Purchase, Google Play Billing and TaxJar.
- Released continuously via GitHub Actions and AWS Elastic Beanstalk; enforced coverage with Codacy and Codecov.
- Instrumented Grafana, Sentry, Leanplum and Braze for system health and engagement campaigns; maintained the WordPress VIP marketing site.

Tech: Java, Ember.js, MySQL, AWS (S3, SNS, SQS, CloudFront, Beanstalk), WordPress VIP, Braze

Tech Lead / Full-stack Developer · Proptexx — AI image generation SaaS

01/2025 – 05/2025

Embeddable widgets and browser extensions that restyle property and product images for real-estate sites. Team of 4.

- Led and mentored 4 engineers: technical direction, code reviews and milestone delivery.
- Built .NET services that provision per-client workspaces and broker widget requests to the AI image module.
- Built the embeddable widget and admin dashboard in Vue 3; integrated Outseta for plans, billing and usage quotas.
- Processed batch image jobs asynchronously with Redis-backed background workers.

Tech: .NET Core, Vue 3, PostgreSQL, Redis, GCP, Outseta

Full-stack Developer · Gaming kiosk — Precommitment Session Module (PIM) 11/2024 – 01/2025

- Sole .NET engineer on a 4-person embedded-hardware team; re-architected the legacy module to modern .NET with DI and unit tests (NUnit, Jest).
- Mapped the PCS gaming protocols, integrated with live terminal hardware over WebSocket, and built a config-driven VanillaJS UI; containerised with Docker and released via GitHub Actions.

Tech: .NET Core, C#, WebSocket, VanillaJS, Docker, NUnit, Jest, Wireshark

Full-stack Developer · Fund Management Portal — Australian fintech 02/2024 – 11/2024

- Delivered portfolio and transaction modules end-to-end in C#/.NET with xUnit/Moq coverage, through to Azure production releases.
- Managed Azure environments with Terraform; integrated internal microservices via Kong API Gateway.
- Built reusable Angular data-table, form and chart components that standardised UI across the portal.

Tech: .NET, C#, Entity Framework, Angular, SQL Server, Kong, Terraform, Azure

Full-stack Developer · AI-Powered Remote Healthcare Platform 01/2023 – 01/2024

- Defined the phased migration of a legacy system to .NET and Azure serverless (Functions, Service Bus, App Service).
- Built clean-architecture REST APIs with OAuth2 security and Application Insights observability.
- Created the Angular component library for care-plan, dashboard and patient-management screens.

Tech: .NET, C#, Angular, Azure Functions, Service Bus, Entity Framework

Full-stack Developer · Integrated Property Tax System — US county 03/2022 – 03/2023

- Built tax-roll correction features and Azure-hosted ASP.NET APIs (SQL Server, Serilog, Azure Monitor); reviewed code and mentored junior developers.

Full-stack Developer · Legacy modernisation tooling (3 projects) 01/2022 – 03/2023

- **Legacy system visualiser** — sole developer; ETL of code entities into an OrientDB graph with an interactive ExtJS UI.
- **Git ETL desktop app** — sole developer; WPF tool extracting and exporting data from multiple Git sources.
- **Data Conversion MVP** — ETL pipeline migrating legacy title-order data (.NET, Svelte, MongoDB).

EARLIER EXPERIENCE · 2018 – 2021

Education Management System — bootstrapped backend, frontend and CI/CD for a 12-person team; 1,200+ students · .NET, Angular	2021
Point of Sale Desktop App — transactions, product lookup, receipts · WPF	2021
Truck & Equipment Sales Queue — order tracking and queue prioritisation · Angular	2020
Water Laboratory Management — sample tracking and inter-lab data sharing · AngularJS, .NET	2019
Telecom Back-Office Portal — Malaysian operator · ASP.NET WebForms	2019
Decentralized Asset Exchange — Scrum Master & React front end · Solidity, Ethereum	2018 – 2019

SKILLS

Backend	C#, .NET / .NET Core, ASP.NET Web API, Entity Framework, SignalR, gRPC, WebSocket, Java
Frontend	TypeScript, Angular, Vue 3, React, Next.js, Svelte, HTML/CSS, Material, Kendo UI
Desktop & Mobile	WPF, WinForms, UWP, Electron, Flutter
Data	SQL Server, PostgreSQL, MySQL, MongoDB, Cosmos DB, Redis, Firebase
Cloud & Messaging	Azure (App Service, Functions, Service Bus, App Insights), AWS (S3, SQS, SNS, CloudFront, Beanstalk), GCP; RabbitMQ
DevOps	Docker, Terraform, Bicep, GitHub Actions, Azure DevOps, Serilog, distributed tracing
Architecture	Clean / Hexagonal, DDD, Microservices, Serverless, OAuth2 / OIDC
Testing	xUnit, NUnit, Moq, Jest, Jasmine, Playwright, k6, Codecov
AI-assisted dev	GitHub Copilot, Cursor, Claude, Windsurf

EDUCATION

Bachelor of Software Engineering
Duy Tan University, Da Nang
